

Skills & knowledge

- Marine & Estuarine Science
 - The Thames Estuary
- Climate Science
- Geographic Information Systems
 - Esri ArcGIS Products, QGIS
- Data Science
 - RStudio, Python, MATLAB, SQL, Tableau, GitHub
- MS Office Suite
- Adobe Creative Suite
- Front-End Development
 - HTML, CSS, JavaScript
- Teaching, lecturing, coaching
- Communication
 - Academic writing
 - Non-academic writing
 - Presenting and speaking to expert and non-expert audiences
- Project and time management
- Problem-solving
- Networking
- Collaboration
- Team and individual work
- Critical thinking
- Research
 - Field and laboratory work
 - Pelagic and benthic sampling
 - Marine mammal, fish, and invertebrate species identification

Languages

- Hungarian (native)
- English (proficient)
- Japanese (beginner)

Wanda Bodnar

Education

Research student | 2024 – present | Queen Mary University of London (QMUL), Institute of Zoology (IoZ) and University College London (UCL) as part of the London NERC Doctoral Training Partnership, United Kingdom

MSc in Marine and Lacustrine Science and Management | 2011 – 2013 | Vrije Universiteit Brussel (VUB), Universiteit Antwerpen (UA), Universiteit Gent (UGent), Belgium

Major: Conservation Biology and Ecosystem Management

Grade: Distinction

BSc in Biology and Physical Education with teaching qualification | 2002 – 2006 | Eötvös Loránd University (ELTE), Hungary

Recognised by UK ENIC and the General Teaching Council for England.

Research Experience

Project officer and Assistant Manager | Thames Estuary Partnership (TEP) | Jan 2018 – March 2022

I worked on the Greater Thames Estuary Fish Migration Roadmap project which included researching, managing and analysing spatial data and the creation of the interactive GIS platform to help visualise the location of fish migratory barriers and river connectivity within the Thames River Basin. The project results were used for the State of the Thames 2021 report published by the Zoological Society of London (ZSL). In addition, I was first author of on a publication and presented the project results at several conferences.

Research Assistant | Royal Netherlands Institute for Sea Research (NIOZ) | Oct 2013 – March 2015

As a research assistant, I investigated the burrowing behaviour of Baltic Tellin (*Macoma balthica*) in the Dutch Wadden Sea. My work included laboratory processing of benthic macrofauna samples and statistical analysis. Following the finalisation of the research, I co-authored a publication. In addition, I participated in pelagic sampling and migratory shorebird catching and ringing.

MSc Research Project | Universiteit Gent (UGent) | Sept 2012 – June 2013

My MSc research project was titled as *Meiofauna associated with seagrasses at natural CO₂ seeps in the Mediterranean Sea* and was part of The European Union 7th Framework Programme called ECO2 project – Sub-seabed CO₂ storage: Impact on Marine Ecosystem (2011-2015).

My research work included laboratory processing and identifying of benthic meiofauna samples, and community ecology analysis to understand the short- and long-term effects of elevated CO₂ concentrations on meiofauna associated with seagrass meadows. With my results I contributed to, and co-authored, a publication.

Teaching Experience

Data & Training Manager | Thames Estuary Partnership (TEP) | Apr 2022 – Sept 2024

As part of the Blue Connections project, I developed and delivered courses on geographic information systems (using QGIS and ArcGIS Pro), data science (using RStudio) and the Thames Estuary. I also organised and co-led fish survey demonstrations for University College London (UCL) MSc Aquatic Conservation, Ecology and Restoration students on the Thames. Accreditation for the latter was obtained via the Institute of Fisheries Management (IFM).

Guest Lecturer | Regent's University London | March 2017 – Apr 2017

I was invited to deliver lectures on environmental pollution and marine mammal mitigation methods used during the construction of offshore wind farms as part of the Environmental Sustainability course.

Work Experience

Natural History Lead SUP Coach | Active360 | July 2017 – Present

I deliver stand up paddleboarding lessons and run the Thames Natural History SUP sessions that introduces participants to the natural history and ecology of the estuary.

Data & Training Manager | Thames Estuary Partnership (TEP) | Apr 2022 – Sept 2024

My focus was on the Roadmap to Climate Resilience project which was about the development of an interactive GIS platform to enable a more integrated and targeted approach for riverside planning and development that also contributes to climate resilience on the Thames Estuary. I also worked on the Estuary Edges project. Estuary Edges are bioengineered intertidal habitats, and I planned, organised and co-led fish surveys using seine and fyke nets, and I was also responsible for data capture, management, analysis and reporting. I also co-authored a publication.

Furthermore, I represented TEP at the London River Restoration Group, Thames Litter Forum, Greater Thames Seal Working Group, Thames Catchment Forum, Thames Eel Management Plan Implementation Group and UK Eel Forum.

Marine Environmental Consultant | Freelance | Apr 2015 – Dec 2017

As a consultant, I worked at sea (North Sea, English Channel, Baltic Sea and Black Sea) implementing marine mammal monitoring and mitigation plans according to government and industry regulations for the offshore energy and renewables sector.

Volunteering Experience

STEM Ambassador | STEM Ambassador Programme | October 2022 – Present

I promote science and the natural environment to young people with talks about the ecology of the Thames.
